Research Interest

My research interests span privacy, security, and human-computer interaction. My dissertation focuses on understanding and improving people's adoption of protective behaviors in the face of privacy and security threats, e.g., in reacting to data breaches or exercising privacy choices on websites. I am also interested in understanding the privacy risks and needs of exposure-sensitive populations, such as survivors of intimate partner violence and older adults. I am a mixed-method researcher, with the most experience in survey, experiment, interview and focus group.

Education

Exp. 2022 Ph.D. in Information, University of Michigan
Advisor: Dr. Florian Schaub

2017 B.S. in Advertising, University of Illinois at Urbana-Champaign
Graduated with the Highest Honor (top 5% in the college)

Employment

06/2020- Facebook Privacy & Data Use Team, remote.

08/2020 User Experience Researcher Intern.

- Conducted a content analysis of internal databases to surface the core privacy-related data practices at Facebook.
- Planned and led 1:1 qualitative interviews with Facebook users on the alignment and misalignment between company practices and user expectations.
- Worked closely with other researchers, product teams, and data scientists to define research questions and communicate insights.

05/2019- NortonLifeLock Research Group (formerly Symantec Research Labs), Culver City, CA.

08/2019 Research Intern.

- Conducted an online survey to examine the adoption and abandonment of recommended practices for security, privacy, and identity theft protection.
- Planned, organized, and ran focus groups to understand how customer support at security companies and spyware notifications could be improved to serve the need of intimate partner abuse victims.

01/2019- Mozilla Corporation, remote.

04/2019 User Experience Researcher Intern.

- Ran usability testings on wireframe prototypes for [Firefox Monitor](#). Insights were integrated to the product's new site to refine risk communications and design.
- Conducted an online experiment to investigate how content and format impact users' decision to react to data breach notifications.
